PROFESSIONAL SUMMARY

Power BI Developer with 17 months of progressive professional experience at Tata Consultancy Services (TCS), transitioning from system engineering support into enterprise business intelligence. Over this period, developed more than 5 interactive dashboards and optimized 5–7 enterprise-grade data models for a German multinational client (Ledvance Digital Future project), achieving 30% performance improvement and 40% data accuracy enhancement. Applied advanced DAX, Power Query, and data modelling expertise to translate complex business requirements into actionable executive-level insights across HR, financial, and operational domains. Proven ability to gather requirements, design multi-page interactive dashboards, publish cloud-based solutions to Power BI Service, and deliver measurable business impact through data-driven visualizations.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Python Libraries:** Pandas, NumPy, Matplotlib
- **Database & Tools:** MySQL, MySQL Workbench
- **Analytics & BI Tools:** SAP Analytics Cloud, Power BI Desktop, Power BI Service, Tableau Desktop, Advanced Excel
- **Data Analytics:** Power Query, DAX, Data Visualization, Exploratory Data Analysis (EDA), Data Cleaning, Data Analysis, Business Intelligence, KPI, Dashboards, Data modelling, ETL, Macros, VBA
- **Core Concepts:** Data Structures, CRUD Operations, Data Cleaning, Data Analysis, Basic OOP Concepts, Agile Methodology
- **Version Control:** Git, GitHub
- **Development Tools:** Google Colab, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Assistant System Engineer | Tata Consultancy Services (TCS) Hyderabad, India | (May 2024 – October 2025)

- **System Design & Development:** Assisting in analysing requirements, creating technical modules, writing clean code and building prototypes under supervisor guidance.
- **Testing & Debugging:** Running test cases, executing performance/load testing, documenting errors, and fixing code inefficiencies to ensure seamless system uptime.
- **Technical Support & Infrastructure:** Assisting in daily operations, automating routine tasks via scripting, and deploying patches, updates, and disaster recovery protocols across servers or networks.
- **Client & Team Collaboration:** Participating in daily stand-up meetings, interacting with clients to interpret technical faults into business language, and preparing detailed technical reports and documentation.

PROJECTS

HR Analytics Dashboard — learning platform – Agileology | (Apr 2026 – Apr 2026)

- **Tech Stack:** Power BI Desktop | Power BI Service | DAX | Power Query Editor | ETL | HR Analytics | CSV | Platform: Agileology
- Developed 7 DAX measures — Total Employees (1,480), Total Attrition (238), Attrition Rate % (16.08%), Active Employees (1,242), Avg Monthly Income (6,500), Avg Age (36.9 years), and Avg Job Satisfaction (2.73/4) — to power all KPI cards and dashboard calculations.
- Built a 4-page interactive HR Analytics Dashboard — Attrition Overview, Attrition Analysis, Employee Insights, and HR Summary Report — featuring 16 visuals including KPI cards, bar charts, donut chart, line chart, matrix table, and department/gender slicers for real-time interactive filtering.
- Uncovered 6 critical attrition drivers: R&D department leads with 133 employees lost; employees earning below 5,000/month account for highest attrition (163 employees); age group 26–35 is most at-risk; Laboratory Technicians and Sales Executives are highest attrition roles; single employees leave more frequently; and employees with 1–2 years tenure are most likely to exit.
- Published the completed 4-page dashboard to Power BI Service for live cloud-based access and concluded that low salary, early tenure (1–2 years), and R&D department placement are the three strongest predictors of the 16.08% attrition rate — insights directly actionable by HR leadership.

Financial Sales Dashboard — Personal Project | (Apr 2026 - Apr 2026)

- **Tech Stack:** Power BI Desktop | Power BI Service | DAX | Power Query Editor | ETL | HR Analytics | CSV | Platform: Agileology
- Built a dedicated _Measures table following Power BI best practices and developed 6 DAX measures — Total Sales (118.73M), Total Profit (16.89M), Total Units Sold (1.13M), Total COGS (101.83M), Total Discounts (9.21M), and Profit Margin % (14.2%).
- Designed a 4-page interactive Financial Sales Dashboard — Financial Overview (executive KPIs), Product featuring 15 visuals.
- Identified that Government segment is the single most valuable customer segment driving 44.22% of total sales (52.5M) and 65.04% of total profit — while USA and Canada each contribute 25M in sales, making them the top two geographic markets out of 5 countries analysed.
- Performed time intelligence analysis revealing October 2014 as the peak sales month at 12.4M, 2014 significantly outperforming 2013 across all segments, Total COGS of 101.83M vs Total Sales of 118.73M

SAP Analytics Cloud Developer | LDF Project – German Client | TCS Hyderabad, India | (Aug 2024 – Aug 2025)

- Developed over more than 5 interactive dashboards and KPI tracking reports using SAP Analytics Cloud for business performance
- Worked with analysing 7 data sets in SAP Analytics Cloud for data transformation and reporting.
- Built and optimized 7 data models ensuring high performance and data reliability to 30 % more.
- Ensured data accuracy, consistency, and integrity across all reporting layers up to 40% for business Outcomes.
- Delivered analytics solutions aligned with cross-functional teams.

EDUCATION

B. Tech – Mechanical Engineering | (July 2019 – April 2023)

Avanthi Institute of Engineering and Technology | CGPA: 7.18

CERTIFICATIONS

Exploring SAP Analytics Cloud — Record of Achievement | (Oct 2024)

Issued by SAP | Foundational Level | Credential: www.credly.com/badges/28b70f9c-22ce-4f3a-99a7-57d09312ef1b
